

CAPG WATCHES

Project Overview:

Capgs Watches is a modern e-commerce website dedicated to showcasing and selling a premium range of watches. The platform provides users with an intuitive shopping experience, featuring stylish product listings, detailed watch descriptions.

Target Users:

- Age: 18 to 60
- Men
- Women
- Kids

Design Specifications:

Colours:

#1C1913 (Very Dark Brown/Black-Brown): A deep, earthy tone that sits between black and brown, offering a rich and grounded look.

#D9D9D9 (A soft, neutral light grey): It offers a clean and modern look, helping other colours (especially bold ones) stand out.

Typography:

Centra No2 Trail: its suits for digital screens that's versatile and readable.

Development:

This web application was developed with HTML, CSS, React js, Javascript , JQuery.

Application Components:

1. Forms
2. Carousel

User Features:

1. Login and Register
2. Add to Cart
3. Checkout
4. Product Filter

Application Flow:

Landing Page:

- Users arrive on the homepage, where they can view featured watches, promotional banners, and product categories.

Filter Products:

- Users explore the collection by browsing different watch categories (men, women, premium, sports).

View Product Details:

- Clicking on a product opens a detailed view with high-quality images, descriptions, price, and specifications.

User Login/Signup:

- Users can create an account or log in to manage orders.

Add to Cart:

- Users select the desired watch and add it to their shopping cart.

Order Confirmation:

- A confirmation page displays order details and estimated delivery time, with an option to track the order.
